CLOUDBURST FIRE BUCKET

CONSIDERATIONS WHEN SELECTING YOUR CLOUDBURST

Do you require the following?

- Additive Injection capability
- An auxiliary power source
Useful when aircraft electrical
power is not available
- Shallow-Fill Pump
- Hard or Soft Shell
Hard Shell has vertical battens

Electrical Power

Refer to the power requirements
table on page 18 for details.

Long Line*

Length can be determined by the customer.

**A Long Line of 50ft/15m or greater is always
recommended with the Cloudburst Fire Bucket.*

THE **CLOUDBURST FIRE BUCKET** IS DESIGNED TO BE STRONG, LIGHTWEIGHT, EFFECTIVE AND IS UTILIZED THROUGHOUT THE WORLD.

Configuration 2 requires a Compressor Module, located inside the aircraft that provides compressed air supply to the Cloudburst Fire Bucket. This module has a corded remote control for crew members to operate the Cloudburst Fire Bucket. It also can be coupled with our Power Control Module, which provides an auxiliary power supply to operate the entire system. Many combinations can be used to accommodate the needs required to operate your Cloudburst Fire Bucket system.

CLOUDBURST FEATURES

The Cloudburst Fire Bucket is the wise investment for military and civilian operations worldwide, with modern features, reliability, and proven design.

The Cloudburst Fire Bucket is made of tough and durable PVC, an industry-recognized super material that is tough and flexible. It is strong, load-bearing, impact-resistant, and capable of withstanding high operating temperatures. This material is chosen for its strength, excellent UV stabilization, and strong resistance to the growth of algae and fungi.

THE **MODERN AND RELIABLE**
APPROACH TO AERIAL FIRE
SUPPRESSION.

AERIAL FIRE BUCKET

CLOUDBURST WITH MONSOON VALVE

Available in either Hard Shell or Soft Shell options.

The Monsoon Valve can be opened and closed multiple times per bucket load.

Please note Valve size relates to bucket volume, refer to the table on page 20.

MONSOON VALVE

The Monsoon Valve requires electrical power to operate and to open/close, providing fast and reliable water release.

MONSOON VALVE BENEFITS

- Shallow-fill Pump option
- Multi-drop
- Low maintenance
- User friendly

INITIAL ATTACK MONSOON VALVE BENEFITS

- Fits in Cargo Basket
- Multi-drop
- Low maintenance
- User friendly

Please note All Monsoon Valves come with a Swath Plate that can be simply fitted to the underside of the Monsoon Valve to provide a broader drop pattern when required.

FAST AND ACCURATE

The 21st century features of the **Cloudburst Fire Bucket** provide rapid filling, fast valve operation, low maintenance and ease of use, making the **Cloudburst Fire Bucket** a reliable, long-term investment.

ACCESSORIES LONG LINES

Optional accessories available for the Cloudburst Fire Bucket range.

+ LONG LINE

Long Lines are manufactured specifically for our clients' requirements with all services encased within the zipped PVC protective cover.

ACCESSORIES

ADDITIVE INJECTION

+ ADDITIVE INJECTION OPTIONS

There is a choice of either a bladder that attaches to the internal side wall of the Cloudburst Fire Bucket, or a rigid tank that is stored in the aircraft cabin.

Either Additive Injection System can deliver a timed volume of chemical into the bucket of water. Agitation will occur during the water release.

+ ADDITIVE CONTROLLER

The optional Additive Controller ensures the quantity of chemical being injected into each load of water is accurate and consistent.

ACCESSORIES

LEVEL LIMITERS + STORAGE

+ LEVEL LIMITERS

Level Limiters can be installed if required to limit the volume of water carried within the Cloudburst Fire Bucket.

Simply remove the plug to allow the excess volume to be discharged from the bucket during the filling process.

+ CARRY/STOWAGE BAG

Compact and tidy, all Cloudburst Fire Buckets up to and including the CB5000 come complete with a Carry Bag.

PUMPS

+ SHALLOW-FILL PUMP DC

Developed to be both effective and easy to use, the 28VDC, 50 amp Shallow-fill Pump is built into the Monsoon Valve, providing mechanical protection when the bucket is manoeuvred into tight spaces for filling.

With a filling rate in excess of 25 liters (6.6 gallons) per second per pump and a minimum filling depth required of 0.2 meters (8 inches) the Shallow-fill Pump is a vital tool when available water sources are limited.

+ SHALLOW-FILL PUMP AC

Shallow-fill Pump AC, a 3 phase 208VAC, 50 amp, 400HZ, 10hp pump at a flow rate of 100 liters (26 gallons) per second.

This assembly has been designed to bolt onto the shell of the Cloudburst Fire Bucket, and is suitable for buckets of 2500 liters (658 gallon) or larger with a Monsoon Valve fitted.

INLINE COMPRESSORS

+ INLINE COMPRESSORS

The electrically powered Inline Compressor offers a lightweight and compact external load, providing a compressed air supply to the Cloudburst Fire Bucket.
